Hello,

Please consider the following comments regarding the current draft of the STIP for Alaska. I regard the maintenance of existing infrastructure as an essential priority to effect the safety and economic welfare of Alaskans. As a commercial fisherman, I implore the state to regard the culverts that fail to allow fish passage, and the backlog of road maintenance that threatens water quality of anadromous streams, with the utmost seriousness and attention for repairs .

The next four years will be critical in maintaining what we already have, and considering the likelihood of diminishing federal funds, I believe it is unwise to pursue large projects such as the Gravina bridge and highway, along with the Juneau Road/ferry Project and Knik Arm Bridge.

Sincerely,  
David Beebe
